Simbus
Simplifying your Business

AUTOMOTIVE · KINAXIS MAESTRO™

Kinaxis Maestro™ is **live.**

So why is ECN impact analysis still taking **a week?**

ECN RAISED — IMPACT ANALYSIS READY

DAY 01	DAY 02	DAY 03	DAY 04	DAY 05	DAY 06	DAY 07

Simbus
Simplifying your Business

THE PATTERN

Live on paper. **A reporting tool** in practice.

BOM revisions and **cut-in dates** don't flow into the model

OEM engineering changes still **assessed offline**

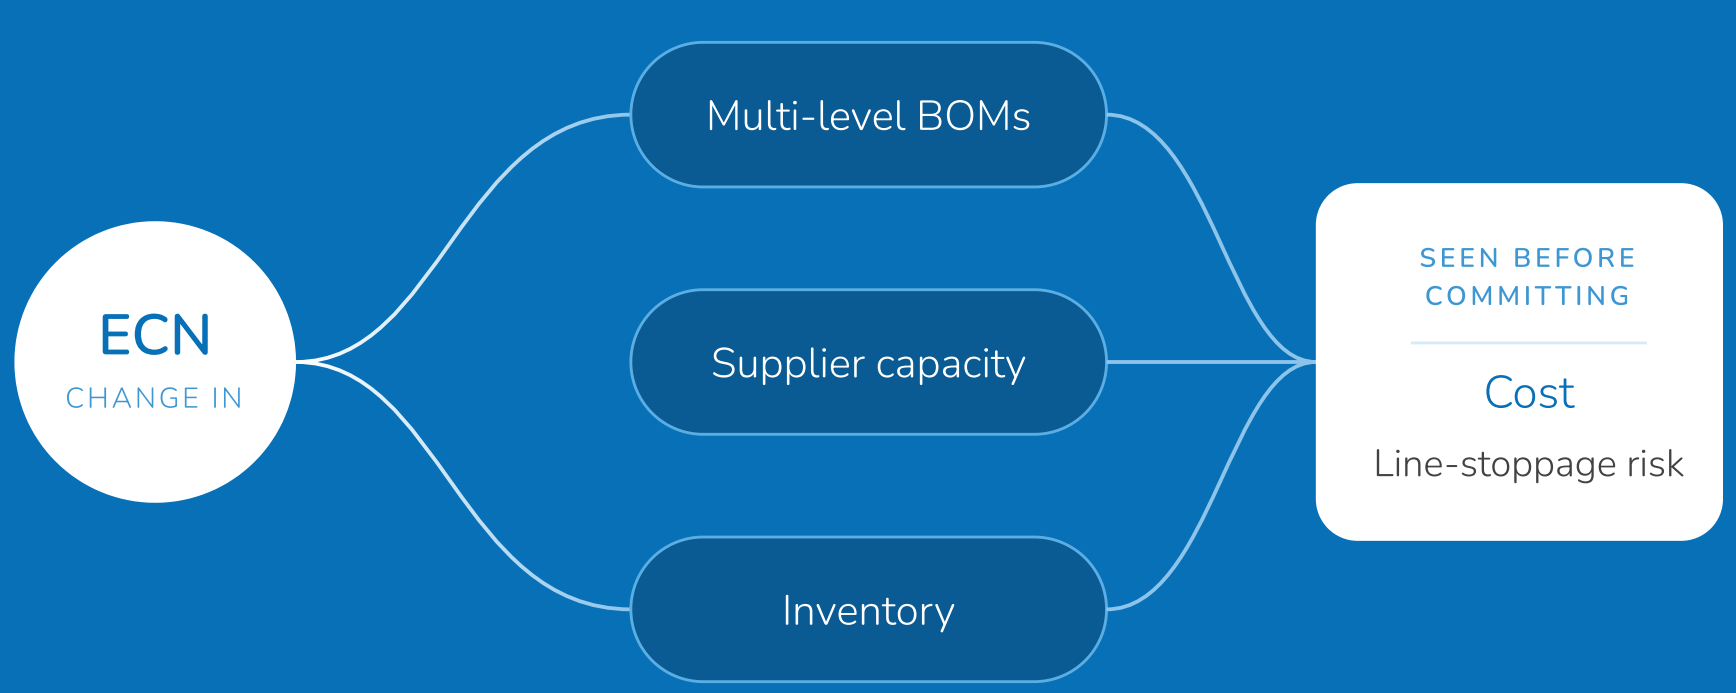

Superseded-part inventory piles up while critical parts go short

Planners quietly rebuild their **old spreadsheets**

Simbus
Simplifying your Business

WHAT IT SHOULD BE

An ECN should take **one working session,** not one week.

> Changes propagate **instantly**. That only happens when the integrations are right and the team is enabled to use it.

Simbus
Simplifying your Business

FOR AUTOMOTIVE COMPANIES ON MAESTRO™

Close the gap with **Simbus.**

01
Adoption audits

02
Rebuilt integrations

03
Configuration aligned to real workflows

04
Enablement through live cycles

- Kinaxis-certified
- Senior named consultants
- Transparent commercials
