Simbus
Simplifying your Business

FOR MULTI-PLANT, MULTI-OEM AUTO COMPONENT MAKERS

Your plants aren't short on data. They're short on agreement.

Every plant, division and OEM account is planning against a different version of the truth.

Plant A	Plant B	OEM X	Division
12,400	11,850	13,200	10,900

Same part. Same month. Four different forecasts.

THE PROBLEM

Where planning breaks down

Conflicting OEM demand signals
Every account sends a different number.

High-SKU lines
One missed signal cascades across the line.

Imported gating materials
Magnets, semiconductors and alloys:
shortages surface only after the line stops.

Siloed spreadsheets
No shared S&OP. No single plan.

Visibility isn't the issue. Alignment is.

Simplifying your Business

THE SOLUTION

Kinaxis® Planning One™ fixes it at the root.

Consensus Demand Planning
Reconciles conflicting OEM forecasts into one number.

Supply Planning
Flags gating-material risk weeks early.

Concurrent S&OP
Syncs every plant in real time on the Maestro platform.

One plan. One truth. Every plant.
