PHARMA PLANNING INSIGHT

₹4 crore of API, expired on a warehouse shelf.

The ERP said stock was healthy, right up until it wasn't.

Simplifying your Business

WHAT WAS ACTUALLY HAPPENING

One planner went on leave.
So did the visibility.

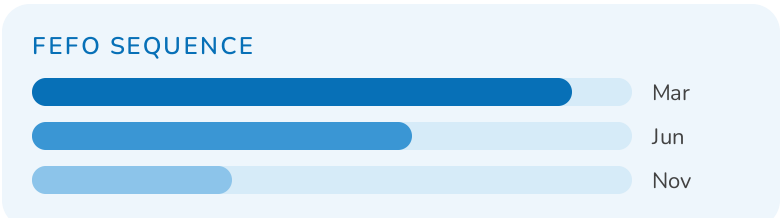

- **MRP** treated every batch as interchangeable, no shelf-life awareness
- **FEFO** enforced manually at dispatch, not planned upstream
- **Slow-moving export SKUs** piled up with no E&O alert
- **Quality holds & retests** missing from available-to-promise
- **Audit trails** for inventory decisions rebuilt after the fact

A write-off isn't an inventory problem.
It's a planning visibility problem.

Simbus
Simplifying your Business

THE FIX

Kinaxis® **Planning One**™ closes the gap

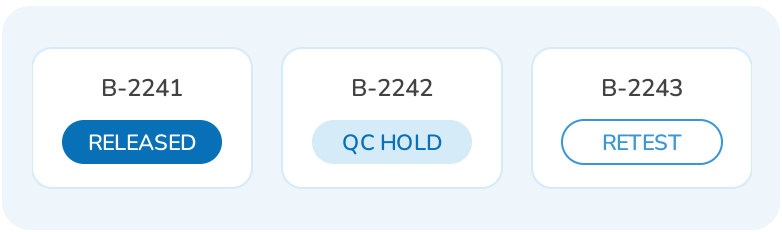

Batch-aware planning

Shelf-life and FEFO sequencing built into the plan, not bolted on at dispatch

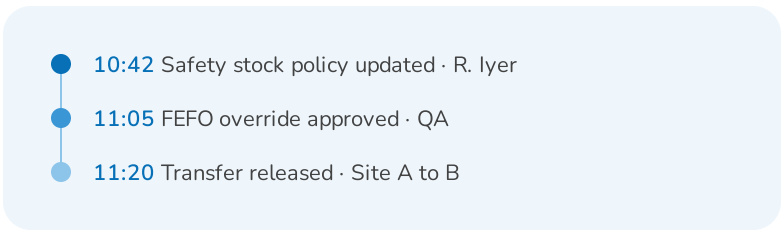

Continuous E&O monitoring

Transfer recommendations across sites and markets before stock ages out

Quality-aware supply

QC status and retest cycles reflected in true available-to-promise

Full audit trails

Every policy and override logged, ready for GMP and regulatory inspection

WHY SIMBUS

Live in 16 weeks.
Accountable long after.

- ✓ Pre-configured pharma batch & compliance templates
- ✓ SAP, Oracle & local ERP integration
- ✓ Senior-led delivery, start to finish
- ✓ Post go-live AMS that owns outcomes, not a ticket queue

How much expiry and E&O exposure is **sitting in your current system?**
