THE LAKEHOUSE ADVANTAGE

Why Enterprises Are Ditching Legacy Data Warehouses

A unified approach to batch + streaming data is reshaping e-commerce & retail →

THE SHIFT

The Shift Is Already Happening

Legacy, siloed warehouses are becoming a bottleneck. More enterprises are moving to a unified Lakehouse architecture — and the results speak for themselves:

- ✓ **Lower data infrastructure costs**
- ✓ **Faster real-time data pipelines**
- ✓ **More accurate, real-time personalization at scale**

> **The common thread?** Unifying batch & streaming on Delta Lake with a Medallion architecture (Bronze → Silver → Gold) — eliminating duplicate sources of truth and accelerating ingestion.

WHAT WE DELIVER

Simbus
Simplifying your Business

How Simbus Databricks Services Helps

Our certified Databricks engineers bring hands-on expertise across:

- **Lakehouse architecture design (Medallion framework)**
- **High-performance batch & streaming pipelines**
- **GenAI & real-time analytics enablement**
- **Cost-optimized, scalable platform builds**
- **End-to-end delivery — greenfield to ongoing AMS support**

From your first Lakehouse deployment to optimizing an existing environment — we've got you covered.
