SEMICONDUCTORS • SUPPLY CHAIN

Is your semiconductor supply chain ready for volatile demand and long lead times?

Capacity, launch, and supply decisions are now billion-dollar bets. One misaligned call risks overexposed capital — or a missed market window.

Simbus
Simplifying your Business

THE PROBLEM

Semiconductor demand swings fast. Commitments often can't keep up.

Long lead times, capital-intensive capacity, and shifting allocations turn growth opportunities into costly missteps — right when speed matters most.

$1B+

capital committed to capacity, launch & supply decisions

Long Lead Times

Fab and wafer cycles span months, not days

Demand Swings

Volatility can strand capacity or supply overnight

Simbus
Simplifying your Business

WHY SIMBUS

Certified Kinaxis Maestro™ partner. Built for semiconductor scale.

Implementation Recovery

Unstick stalled Kinaxis Maestro deployments and get back on track.

AMS Support

Ongoing support that goes beyond break-fix.

Value Realization

Close the ROI gap and prove the platform's worth.

Kinaxis + Databricks Integration

Clean, AI-ready data for smarter, faster decisions.

Simbus
Simplifying your Business

LET'S BUILD TOGETHER

Align demand, capacity & supply decisions — with confidence.
