Remove unpredictability,
Preempt disruptions in your supply chain

Simbus
Simplifying your Business

SOLAR MANUFACTURING · ALMM

A one-week delay can make your solar modules non-compliant.

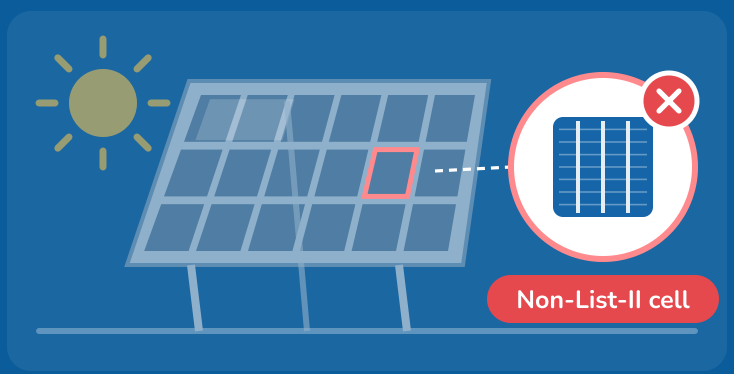

Here's why India's manufacturers are rethinking how they plan 👇

31
COMMISSIONED
DEC 2026

✓ **Compliant**
Non-List-II cells allowed

+1
DAY

1
COMMISSIONED
JAN 2027

✕ **Non-compliant**
List-II cells required

Applies to **net-metered** and **open-access** projects from 1 Jan 2027.

Swipe to see why →

THE PROBLEM

Simbus
Simplifying your Business

Cells are the **new bottleneck.**

RATIO

5:1

module lines for every cell line in India

ALMM-LISTED CAPACITY

List-I modules ~228 GW

List-II cells ~45 GW

TOPCon is 80% of listed modules, but only ~⅓ of listed cells.

SAME LOOK. DIFFERENT PROJECTS. DIFFERENT PRICE.

DCR
TOPCon module
₹22 /Wp
→ DCR projects

NON-DCR
TOPCon module
₹14 /Wp
→ Non-DCR projects

> **Root cause: allocation in silos.**
> Every misallocated MW costs real money.

THE SOLUTION

Simbus
Simplifying your Business

Kinaxis® Planning One™

One plan. Every rule.

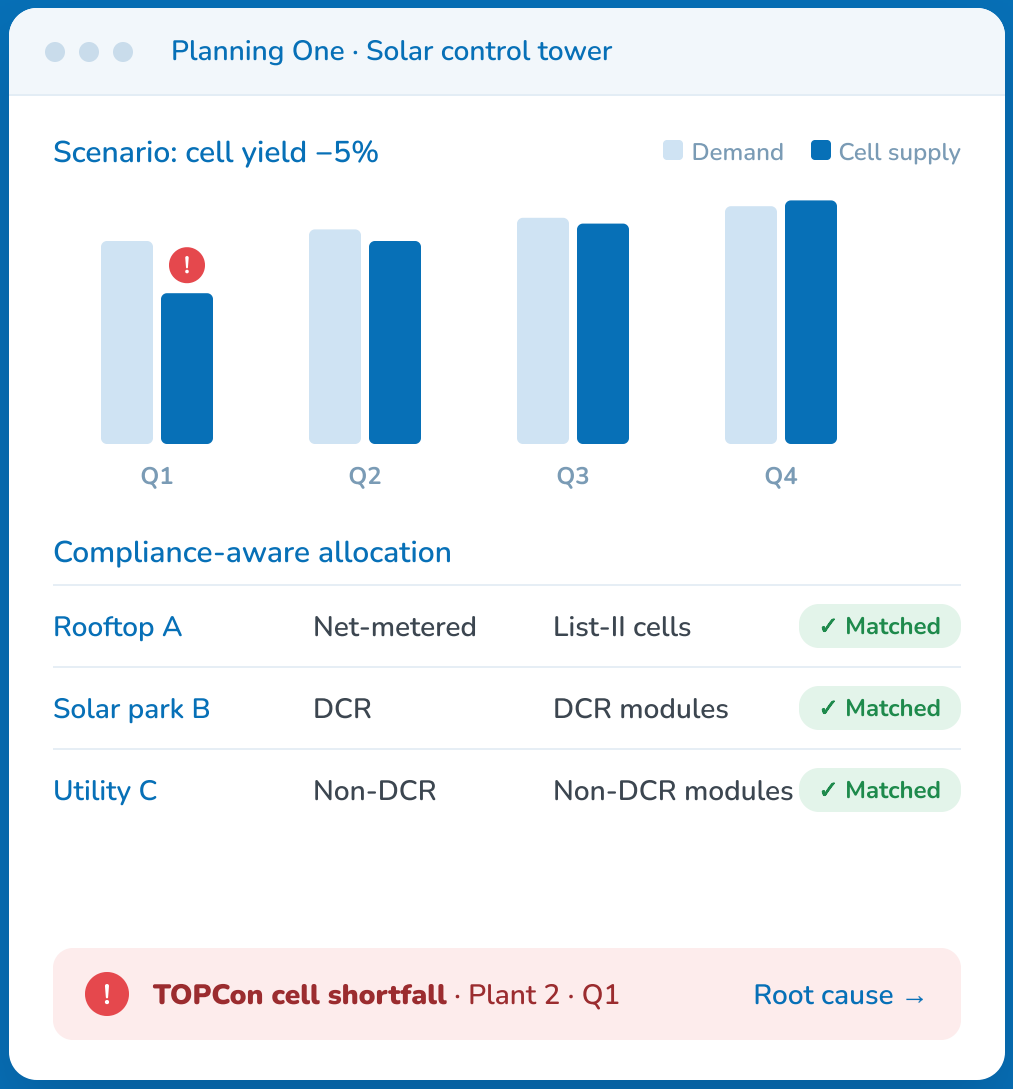

One shared plan
Demand, supply, inventory and capacity across every plant.

Scenario planning
Test order wins, cell yields and price swings first.

Compliance-aware allocation
List-II and DCR stock to the projects that need it.

Control tower
Spot shortages, excess stock and risks early.

⏱ Live in as few as **16 weeks**

WHY SIMBUS

Simbus
Simplifying your Business

See your plan, in just 2 weeks.

1

WEEK 1

Map your exposure

Order book, cell supply and ALMM / DCR status across plants.

2

WEEK 2

Model the scenarios

Commissioning slips, cell yields and price swings.

3

DAY 14

Leave with a roadmap

Quick wins plus a structured path to go-live.

WHAT SIMBUS BRINGS

- ✓ Planning models for integrated wafer, cell and module operations
- ✓ Workflows for ALMM, DCR, MNRE and BIS
- ✓ Integration with SAP, Oracle and local ERPs
- ✓ A fast, structured path to go-live

Free 2-week assessment
