Simplifying your Business

WIRE & CABLE · INVENTORY

Thousands of SKUs on the shelf.

The one your dealer needs?

Out of stock.

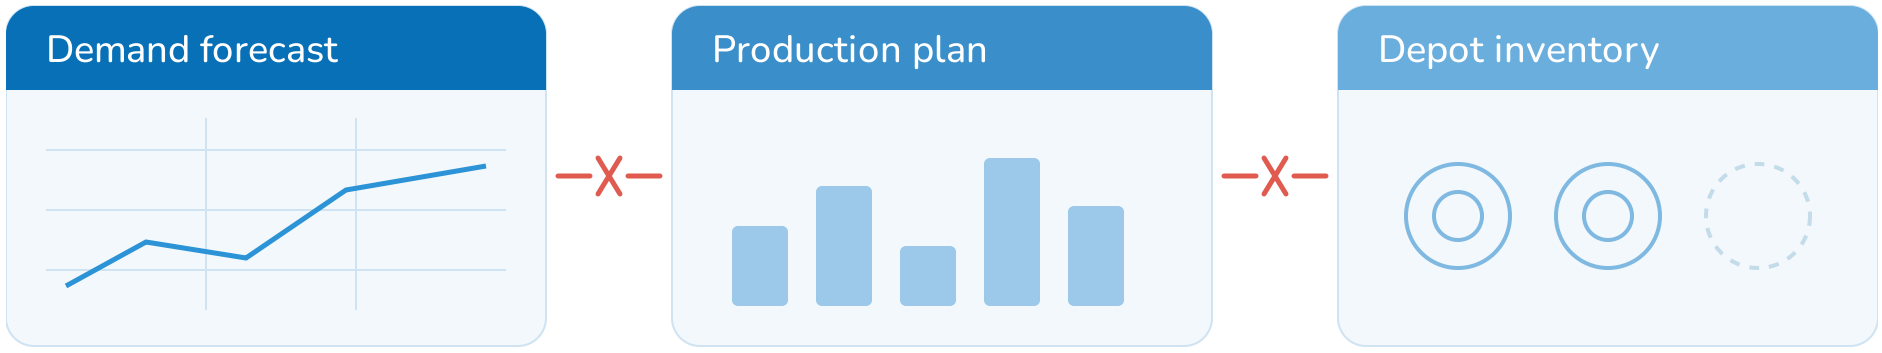

THE PROBLEM

Simbus
Simplifying your Business

Too much of what's slow.
Too little of what sells.

Gauges, conductor types, insulation grades, colors and coil lengths, spread across a wide dealer network. Slow movers tie up working capital while fast movers run short where demand is highest.

ROOT CAUSE | **Planning in silos.** Nobody can see which SKU is needed where, and when.

THE SOLUTION

Simbus
Simplifying your Business

Kinaxis® Planning One™

One connected view.

- Consensus demand planning
- Inventory policies by SKU and location
- Excess and obsolete analysis
- Inventory transfer recommendations

5–25%*
decrease in total inventory

8–37%*
improvement in customer service

*Typical results reported by organizations using Kinaxis.

Simbus
Simplifying your Business

Strategy and delivery, **under one roof.**

Design

Principal consultants shape SKU and inventory policies around how you actually sell.

40

Implement

Kinaxis-certified consultants put them in place, fast.

Adopt

An embedded team drives adoption long after go-live.

Stock what your dealers need, **not what's sitting idle.**
